

## BIOMASS ENERGY RESOURCES

# Coconut Shell Powder

## Catalog

**Biofuel Resource** has committed becoming one of the leading green and renewable energy providers from Malaysia. We supply *palm kernel shell, palm fibre, shredded EFB, wood chip, saw dust pellet* and *EFB pellet* for domestic and worldwide biomass boiler and power plant.

**Coconut Shell Powder** becomes scarcity commodity as the application has shifted from mosquito coil to polymer application.

## Coconut Shell Powder

Coconut shell powder is the product from coconut shell. The coconut shell will go through a crushing, grinding and sieving process becomes coconut shell powder.

Coconut shell powder is one of the main ingredients for mosquito coil. Currently we are seeing the coconut shell powder being used in plywood and polymer process. The new application has driven a consumption growth for this commodity.

In Malaysia, even the coconut plantation is getting lesser but the volume still sufficient to support the high end market.
